

3d pen filament size

ABS engineering plastics has excellent impact strength, good dimensional stability, electrical properties, abrasion and good chemical resistance etc.

In 3D printing application, ABS is commonly used in industrial grade printing due to its high strength property. We have more than 26 common color ins tock: Red, yellow, blue, green,orange,violet,white,gray,black,gold,silver,pink,skin,fluo-red, fluor-orange,fluo-yellow,fluo-blue,fluo-green,Rose,brown,Lavender, Sky-blue...more and more

Product Information			
Item :	3D pen filament ABS	Net Weight:	100g
Material :	ABS	Gross Weight:	100g
Diameter/tolerance :	1.75+- 0.02mm	Print temp:	230-260°C
Length :	10m	print speed:	40-100/s
Test report	Rohs	Package qty:	100rolls

QFA

Q1. What is your company product?

A: Our main product ranges cover 3D printer, 3D printer accessories, 3D printer mainboard, 3D printer filament etc, with good quality and factory direct price.

Q2. Can I customized the products?

A: Yes, our product is customized, any specification will be accepted. Please kindly tell our your request.

Q3. What is your delivery time about the production?

A: For the sample, general 3-7 days. For the production, within 30 days (per your order quantity).
